Hi Carol,
No, the email below is regarding the QAPP Monitoring Report for Blueberry Park which was required under our Dept. of Ecology grant.

Hi Colette,

I'm working on a public records request involving the Sesko/McConkey Chevron property (brownsfield) grants - does this e-mail string (below) have anything to do with those properties, do you know? Thanks,

Carol

Hi, Tom.

As I explained in my note to you a week before (pasted below these to/from EPA) I have been coordinating with the EPA lab and our science advisors in the development and review of the QAPP. Since EPA had already approved the first draft of the QAPP, I need to make sure the additions/changes meet with their approval before any fine-tuning on procedures. They have also requested the number of samples monthly which are not expected to begin regularly until post-construction (next fall) for the Ecology-paid portion. I need an updated schedule from you folks as well. Until then, we will only be testing grab-samples from the drainage pipe at no cost to Ecology until after construction. Our agreement was that I would complete the QAPP and collaborate with our science advisors, EPA, and Ecology. Since you had some suggestions on the procedures used to monitor flow levels from the green roof system, I would be happy to incorporate those procedures more specifically. I have also updated the section on the whole site flow monitoring per Chance's email.

Another change is that Mike Shepherd, president of the Kitsap Trees & Shoreline Association (KiTSA), will be the volunteer coordinator. He has had initial talks with the high school and will be the best one to oversee the data quality objectives. He is retiring this month from the US EPA where he worked in cleanup projects, restorations, and Brownfields programs. Environmental sampling programs are some of the things he designed and supervised so we'll be good to go!

I expect to hear back from EPA soon and touched base with Anne Dettelbach regarding this coordination. As we get closer to a next-to-final version of the QAPP as we agreed when this work began.

Best,

Kathleen

Subject: REVISED Bremerton Blueberry Park LID QAPP Draft

Hi Bethany,

Per our discussion this morning, I have attached the revised QAPP addressing the comments from Ecology's stormwater engineer's first review.

Additional changes include your letter and updated schedules, etc.

I look forward to receiving your suggested suite of chemical/metals analyses. I will then incorporate that list into the QAPP as an Appendix.

Thanks!

Kathleen

Kathleen,

You did a wonderful job on the QAPP. I have attached a word document memo stating my approval and a few other comments regarding what is required at Manchester Lab (it is a little different than CLP). Also, will you email me an approximate number of samples per analysis that will be collected monthly? I need it to give to the lab so they can schedule their work around this project. Please let me know when you plan on sending over the first batch of samples.
(See attached file: BremertonLID.doc)

Let me know if you have any questions!

Hi Tom,

I will be back on Wednesday and touch base with you all then. I don't have any files with me.
Ciao.

Kathleen

Subject: RE: your emailed question about QAPP

Hi Kathleen,
Wow, I wish I was where you are right now!!
What you said makes sense, so when you get back (or sooner, if possible), can you send us a copy of the updated QAPP so we can give input on it for you to include in your report to DOE. We certainly do not want to re-write the whole document. Just want to see what we are committing to and anything that we can streamline to make easier for us.
Thanks,
Tom

Subject: your emailed question about QAPP

Hi Tom.

I am accessing my email via the web as (b) (6) . My daughter is (b) (6)
(b) (6)
(b) (6) . I had (b) (6) yesterday as well.

So, the short of it is this:

Colette had postponed the work on the QAPP due to some final design plan changes in the park. She then reinitiated the work and I had been updating the sections while coordinating with the EPA lab. They had already approved the QAPP so I have to make sure the additions/changes meet with their approval. I don't think that will be a problem. They have also requested the number of samples monthly which are not expected to begin regularly until post-construction for the Ecology-paid portion which I don't have a clear schedule from you folks for. We will only be testing grab-samples from the outfall at no cost to Ecology until after construction.

Our agreement was that I would complete the QAPP and collaborate with our science advisors, EPA, and Ecology. It was fine that Chance and Colette wanted to have input on the procedures for the flow meters and even the green roof if they like. However, I can not have either rewriting the 30-page document at this point in time. Ecology has already reviewed the first draft, provided comments, and awaiting this next version once I have also accomplished the aforementioned approval/collaboration with the science advisors and EPA named in the QAPP.

I am sorry but that's the way it has to be and I hope that you help Colette understand that.

I also see that Luis and KiTSA have sent out a request for updates and I approve that as well. I also think that it is time for the City to use a contact within KiTSA different from me so that I can clearly distinguish my volunteer work from paid work. That should probably be Luis or Mike Shepherd at this time, so make sure that you direct all notices and requests from the Parks staff to KiTSA to those individuals.

Thanks.

I'll be back early next week!

Kathleen

Subject: QAPP

Kathleen,
I need to clarify my last email. I would like to get the word document for the QAPP, so we can edit it if we need to before sending it to DOE.
Thank,
Tom
